

Asset Request Form

The Novia Investments List details the wide range of assets available through the Novia Financial platform. This includes Authorised funds (Unit Trusts, OEICs and SICAVs) and ETFs traded through Winterflood.

Please use the link to check firstly whether the asset is already available through Novia;

<http://www.novia-financial.co.uk/investments/investmentslist/>

If the asset is not available with Novia, please complete this form to request a new asset that will be reviewed by the Novia Investments team. If the product provider is not currently on the platform, the assets may take considerably longer to make available.

Please note all fields must be completed with the exception of the Business case for adding fund(s), which will be completed by your Novia Regional Sales Manager. Failure to complete will result in the request being rejected. Once completed, please email the form to your Novia Regional Sales Manager.
